

**All members are invited to a very special LWV La Plata County meeting on April 13, 10 am at the new Ft. Lewis College Geosciences, Physics & Engineering building, now officially known as the Sitter Family Hall.**

We will have guided tours of the entire building, explaining the marvelous things that can be, and are being, done in this wonderful new facility. The tours will last approximately an hour, then we will have a chance to learn all about the financing of the building, the delays, the politics and the issues of financing State higher education in the current economic climate. At noon, we are invited to have lunch in the Student Union, where a room will be reserved for our use.

This building is officially opening with a public tour, but we will have a private peek, with our own guides, and see how this building is changing the study and research of the sciences at Ft. Lewis. What is being done now at the Fort is an extraordinary story, and we will see and hear it first hand.

There will be more information about details of where to park, how to find the building, etc., in a later correspondence. For now, it will be helpful to get an estimate of the number of people who will attend. **Please reply to this email if you think you will join us for this event.**

I look forward to seeing many of you on the 13<sup>th</sup>.
